

Application Letter – Analyst Development Program PEFINDO

Dear Sir

My name is Firhat Nawfan Hilmanda, I hereby applied as Analyst Development Program in PEFINDO

I took bachelor degree in Universitas Indonesia, majoring in Management, taking Finance as my sub-major. During the course of my study, in addition to the core mandatory classes of *Financial Statement Analysis, Capital Budgeting and Project Finance, Business Simulation, Security Analysis, Portfolio Management, and International Finance*; I had taken up the initiative to take elective classes of: *Treasury Management, Banking Management, Human Resource Training and Development, and Management of Technology and Innovation*.

Although my academic achievement was not as polished as others better applicants, I'd like to assure you that I will not fall short upon your expectation. In college I had been a well-read person, attentive, inquisitive, and fast learner, sociable, team worker, and critical thinker. I am also a man with an inquisitive mind with broad interest in several field, I do not shy away from unfamiliar territory when the job necessitate me to do so.

I've had the benefit of experiencing being a failure before; therefore I valued every opportunity presented before me. I understand that you expect high standard, and I am convinced that I can fulfill your expectation

In the next 5 years, I intend to broaden and deepen my knowledge and competence regarding issues and inner working of financial world. **Currently I am interested but not limited in these issues:** Value investing particularly valuation of technology companies which differ from traditional companies in term of valuation; Company restructuring and turnover from the brink of bankruptcy into success, dealing with the financial aspect, talent/HR aspect and strategic aspect of this process; International finance, commodity transaction and hedging, due to my Undergraduate Thesis dealing with the issues of Financial Contagion; Data Science and business related process, a lot of business taken a more reactive approach to market, but with the usage of data science one may predict a certain pattern which previously may escape their attention, this is particularly true for the more bigger and complex

business; The role of Special Purpose Entity dealing with various aspect of business especially but not limited to legal issues related to patent and intellectual property

Currently, I can provide analytical skill in the field of financial analysis, and strategic analysis, I am also currently building capability in programming and information technology, I intend to build around these field, but I will not shy away nor refuse any opportunity to broaden and deepen my expertise. On a more practical side, in the next 3 years I intend to take both CFA test and CRM test.

I understand that career at PEFINDO will be a very enhancing and interesting experience, and I believe that in return I can contribute a lot to PEFINDO

If I was accepted I am willing give it all, work hard overtime and in holidays. I am willing to get a lower salary considering that career in your company will provide the sets of skills and opportunity and a more than decent career path.

Regards

Firhat Nawfan Hilmanda
